## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sorkin 508' in view of New et al 465'. Sorkin I teaches the claimed plasma torch with a pivoting head, as claimed, but do not specifically set forth restricted pivoting number of angles relative to the torch body. The patent to New et al is applied for teaching torch head 120,70 which restrictively pivots, barring further description of the same, with respect to the torch body 54. This pivoting enables a greater versatility of the torch and in view of this teaching it would have been obvious to modify the Sorkin et al system with the same , to enable work of greater number of shapes to be processes.
